

We're on a mission to reduce our city's emissions

Our current bus fleet

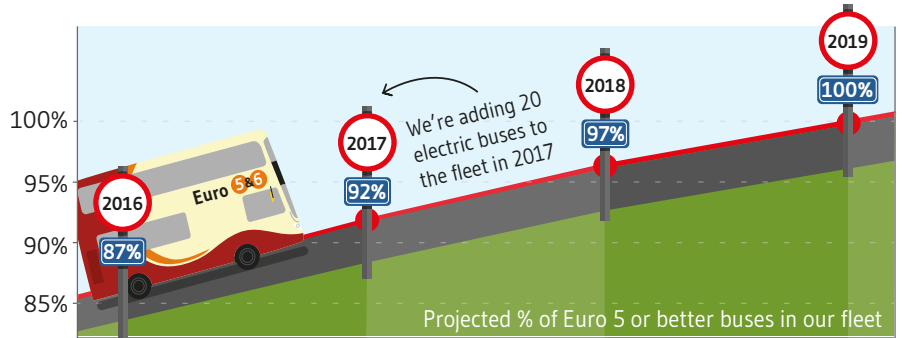

Every day our buses take
50,000
cars off the city's roads

That's equivalent to preventing a two lane tailback from Brighton to Southampton!

Where we're heading

Over the next three years we're upgrading our fleet with more Euro 6 hybrids and electric buses.

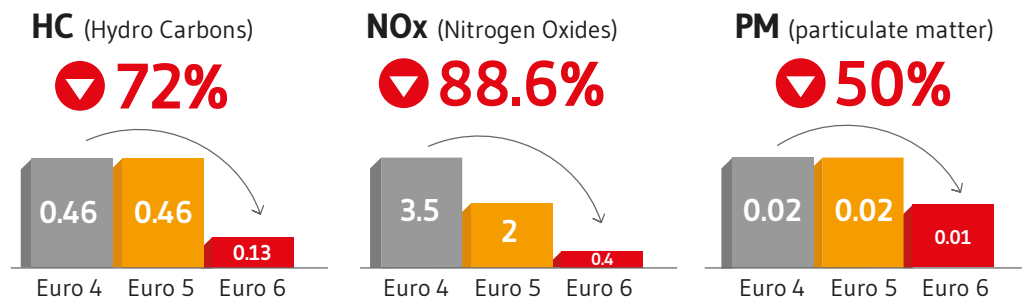

We're ahead of the low emission zone requirements set by the city council.

- ✓ Only Euro 4 or better from January 2017
- ✓ Only Euro 5 or better from January 2020

Euro emissions

The drop in Hydro Carbons, Nitrogen Oxides and particulate matter between Euro 4 and Euro 6 is significant.

Measurements are g/KWh
